ABOUT

Full Stack Developer with 2+ years of experience in building responsive, user-friendly websites and applications. Proficient in HTML, CSS, and JavaScript frameworks, with a strong passion for exploring new technologies in Front-End Development. Gained valuable experience working in a Japanese & Australian IT company, where I developed a deep understanding of professional work ethics and cross-cultural collaboration.

PROFESSIONAL EXPERIENCE

Frontend Web Developer (Full Time)

PT. Softwareseni, Yogyakarta

November 2024 – Present (6 Months)

- Developed an HR Internal Application for candidate profiling, enhancing efficiency with Next.js, React, TypeScript, and React Query, implementing WYSIWYG editor with debounced CRUD operations.
- Built a Second-Hand Car Marketplace & Car Service platform for Astra Group using Next.js, React, and React Query, ensuring seamless user experience.
- Designed and delivered client-requested websites using CMS-like platforms, leveraging JavaScript, jQuery, and CodeIgniter 3 for dynamic functionality.

Junior Full Stack Web Developer (Full Time)

PT. Softem Mitra Indonesia, Jakarta

December 2022 - March 2024 (1 Year 4 Months)

- Completed 3 months probationary period by developing an internal-use website with React Typescript and Tailwind CSS.
- Assumed responsibility for developing and maintaining internal transaction programs (wholesale products) for a Japanese client, utilizing the MVC architecture pattern with C# and ASP.NET during the next three months.
- Customizing/rebuilding/reconstructing Japan Prison internal application with React Typescript and Java Spring Boot.
- Continued to manage development, maintenance, bug fixing, and code reviews for Japan Child Consultation internal application using Java Spring Boot framework (Back-End) and Thymeleaf with Bootstrap (Front-End).

Team Leader in Creating Field Monitoring and Administration Mobile Application (Intern)

PT. Kelola Jasa Artha, Surabaya

October 2021 - February 2022 (5 Months)

- Led a cross-functional team in the successful development and launch of a field monitoring and administration mobile application, ensuring adherence to project timelines.
- Creating barcode scanner in mobile application to monitor field staff when distributing money using Android Studio with Java programming language.
- Created UI design for mobile applications using Figma and Android Studio.

Team leader of Business Intelligence Team in the Development of a Web-Based Dashboard Management System for BUMDES NGINGAS during College Community Service (Intern)

Institut Teknologi Sepuluh Nopember, Surabaya

July 2021 - December 2021 (6 Months)

- Spearheaded a team of 5 members in the development of a user-friendly web-based dashboard management system for BUMDES NGINGAS to help streamline operations and improve decision-making processes.
- Developed a management dashboard using Vue for public access and Power BI for internal reporting, both backed by Laravel and MySQL databases.
